Klipso

Multi Event app   + Kiosk

THE EVENT APP 365 DAYS A YEAR!

Create a permanent application for your community

With one app:

- Offer access to all your events
- Present upcoming events and allow access to past ones
- Each event within the app is independent (data, features, appearance)
- Create cross-cutting content for continuous digital presence
- Provide cross-cutting features for your communities
- Push notification: engage your audiences all year round

The event is a media for your community: extend it!

Increase the ROI of your app. It is no longer ephemeral and gains value.

Multi-event application + Kiosk

Pour publier tous vos évènements dans une seule application.

- To publish all your events in a single application.
- Announce upcoming events
- Find past events
- Offer cross-cutting features and content
- Create content outside of events and filterable according to connected profiles

Each event within the kiosk is like a dedicated application: each event within it can have its own design, data, and choice of features.

The user easily transitions from the kiosk to an event and vice versa. Highly customizable via a back-office built on Klipso: **the App Studio**.

Créez une application permanente pour votre communauté !
